

Welcome to Big Sky Resort, where wide-open spaces meet dramatic peaks and create [world-class skiing experiences](#). Rocky Mountain snow falls consistently on 5,850 acres of skiable terrain, ranging from wide-open groomers to dynamic glades and challenging steeps, making for unmatched terrain variety. 300 degrees and 4,350 vertical feet of skiing off Lone Peak means you'll never ski the same line twice. Offering more than an acre per skier on average, Big Sky provides serious elbow room. Navigate the mountain via the most technologically advanced lift network in North America, including heated seats, weatherproof bubbles on four chairlifts, and unparalleled comfort in the new Lone Peak Tram. Big Sky Resort is in the Northern Rockies of southwest Montana between Bozeman, Montana and Yellowstone National Park.

### Introducing the new Lone Peak Tram

Big Sky Resort is transforming the winter and summer experience on the resort's centerpiece, the iconic [Lone Peak Tram](#). The new tram is opening in the 2023-24 ski season, providing unrivaled comfort and speed to Big Sky's high-alpine terrain. The new tram unlocks more access to the highest scenic overlook in Montana in both winter and summer, complete with views of Montana, Idaho, and Wyoming, as well as Grand Teton and Yellowstone National Parks. With the Explorer Gondola opening in winter 2025-26, Lone Peak's summit will be accessible for pedestrians of all mobility levels in both winter and summer seasons.

### Big Sky Resort Celebrates 50 Years

We call that a pretty good start. In 1973, Big Sky Resort opened with four lifts and less than 20 trails. [Fifty years later](#), with 300+ trails spanning 38 lifts, Big Sky Resort is celebrated as a world-class North American ski destination. A legacy of innovation continues here, as Big Sky Resort marks its 50<sup>th</sup> year with the most monumental project yet – the brand new [Lone Peak Tram](#).

### Mountaintop Magic: Fine Dining at Everett's 8800

At 8,880 feet with Lone Peak emerging through Everett's large glass windows, Executive Chef Chris McCracken marries the high-alpine influence of the Alps with his homestyle kitchen beginnings to create a world-class culinary experience for skiers and gastronomes alike. Getting there is half the fun: ride Ramcharger 8 (complete with heated seats and weatherproof bubbles) to the top of Andesite Mountain, greeted by the warm, welcoming glow of Everett's 8800. Named by Architectural Digest as the Most Beautifully Designed Bar in Montana, there is no better place to enjoy a fireside cocktail that warms the soul after a long ski day or savor a perfect wine pairing with dinner.

### [Big Sky 2025](#)

Big Sky 2025 is an ambitious 10-year vision transforming the Big Sky experience from the moment you touch ground in Montana to the top of Lone Peak. Inspired by the connectivity and infrastructure of the Alps and our Montana culture, improvements across the many touchpoints of the resort elevate the mountain experience for our guests and community.

### The ForeverProject: Taking Care of People and Planet

The ForeverProject is Big Sky Resort's sustainability roadmap to reach net-zero carbon emissions by 2030. Since January 2021, 100% of Big Sky Resort's electrical use is carbon-free. Ongoing projects reduce the resort's energy use, such as upgraded hotel thermostats, solar-powered operations elements, and advanced snowmaking systems.

### Air Capacity

With direct flights to 20 cities in the winter, Bozeman Yellowstone International Airport is the most well-served ski destination across the United States aside from major hubs.
